

Sustainability Performance Dashboard

5,000 m² Office Building · UAE · Energy Benchmarked Data · 2025

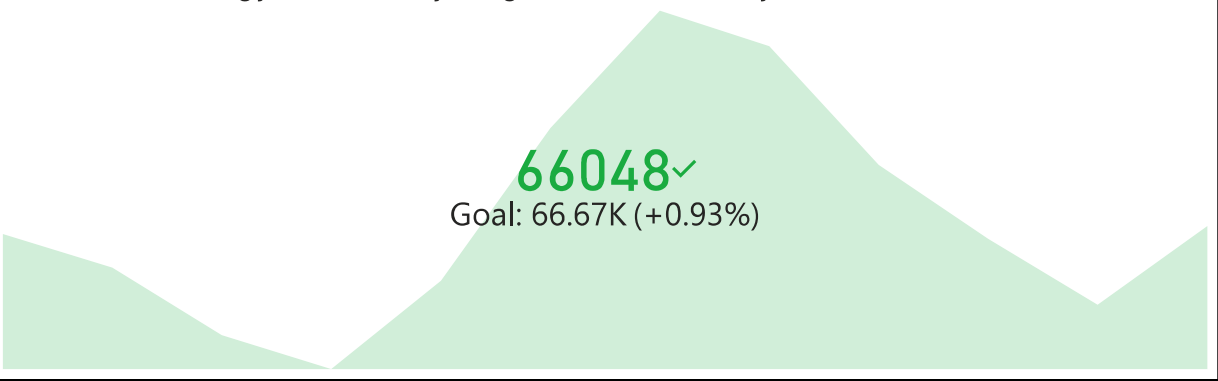

Monthly Energy Consumption (kWh)

Monthly Carbon Emissions (kg CO2)

December energy vs monthly target (160 kWh/m²/yr)

Key Insight: HVAC accounts for the majority of building energy consumption.

In peak summer months (Jun–Aug), HVAC drives 60% of total energy use — making it the primary lever for both cost reduction and carbon performance improvement.
