

Sustainability Performance Dashboard

5,000 m² Office Building · UAE · Energy Benchmarked Data · 2025

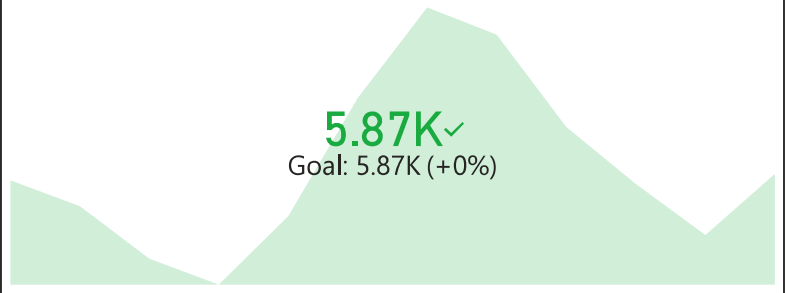

Monthly Energy Consumption (kWh)

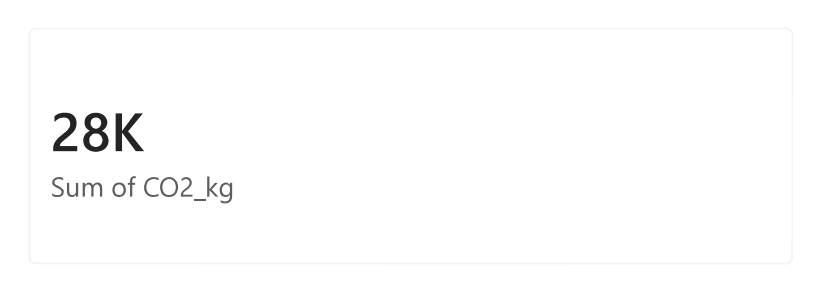

Monthly Carbon Emissions (kg CO2)

Energy vs Target

Total CO2 Emissions (kg)

Key Insight: HVAC accounts for the majority of building energy consumption.
In peak summer months (Jun–Aug), HVAC drives 60% of total energy use — making it the primary lever for both cost reduction and carbon performance improvement.
